

FACED PRODUCTS

U-Spec has the facility to apply a wide range of facings to a variety of insulation and building products. We specialise in applying a range of facings and linings that are not available on bulk-produced products from main manufacturers; or supplying small-quantities of products with standard facings which are available from main manufacturers but with volume or lead time restrictions.

Benefits of using U-Spec for your facing requirements

- No minimum order quantities
- Short lead time
- Wider range of facings and sizes

Factory-applied facings

The table gives an overview of the most common facings which we have readily available, and the typical insulation products to which the facings are generally applied. However, we should be able to apply any type of facing to any type of product to suit you or your customer's requirements.

Facing	Typical Use	INSULATION SLABS	INSULATION ROLLS	PIPE SECTIONS	Other Products
		Glass wool Rock wool Phenolic/PIR/EPS/XPS	Glass wool Rock wool Lamella Mat Needle Mat Ceramic Blankets	Glass wool Rock wool Phenolic
